TECHNICAL SUPPORT | APPLICATION SUPPORT | SOFTWARE TROUBLESHOOTING

Odessa, TX | (786) 307-4352 | danielfernandez.tech@gmail.com | [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Software-trained technical professional with hands-on experience in TypeScript, SQL, application development, debugging, and software testing, combined with a strong background in customer-facing technical problem solving. Experienced in gathering requirements, investigating issues, documenting findings, and coordinating solutions across customers and internal teams. Seeking to apply this combination of software knowledge and professional support experience in a technical or application support environment.

TECHNICAL SKILLS

Languages & Frameworks:	TypeScript · JavaScript · Next.js · React · HTML/CSS
Data & Databases:	SQL · PostgreSQL · Prisma · Supabase
Testing & Debugging:	Jest · Software Testing · Debugging · Browser DevTools
Web & APIs:	REST APIs · HTTP · JSON · OAuth
Development Tools:	Git · GitHub · Vercel

TECHNICAL PROJECTS

DEALER MATH — Automotive Finance Calculator

Next.js · TypeScript · Jest

- Built an automotive finance calculator that models vehicle purchases across multiple loan terms using price, down payment, APR, sales tax, dealer fees, and trade-in equity.
- Implemented calculation logic for trade-in payoff vs. dealer offer, positive/negative equity, financed amount, interest, and estimated monthly payments across 36-72-month terms.
- Uses Jest-based unit testing to validate calculation behavior and expected outputs as financial logic evolves.

ARTIST OF ECHOES — Full-Stack Visual Library

Next.js · TypeScript · PostgreSQL · Prisma · Supabase · OAuth

- Built a full-stack visual library for organizing and presenting artistic photography through a responsive web application with persistent user and content data.
- Implemented a PostgreSQL-backed data layer using Prisma and Supabase to manage application data, relationships, and persistent content.
- Integrated user authentication with Google OAuth and deployed the application to Vercel, connecting frontend, authentication, and database services in a production environment.

PROFESSIONAL EXPERIENCE

TG WATER SYSTEMS — Water Treatment Consultant 2025–Present

- Assess customer requirements and technical conditions to identify appropriate system configurations, translating operational needs into practical technical solutions.
- Investigate customer-reported issues, document technical findings and requirements, and coordinate resolution across customers, installers, and internal teams.
- Own customer issues from initial assessment through post-installation follow-up, providing technical guidance, resolving concerns, and maintaining clear communication throughout the service lifecycle.

LOWE'S — Flooring Sales Specialist 2023–2025

- Managed multiple customer projects simultaneously from requirements gathering through installation, coordinating timelines, documentation, vendors, and issue resolution.
- Used internal systems to maintain project records, track status, and coordinate with customers, installers, vendors, and internal teams to resolve issues.

WALMART — Associate 2020–2023

- Supported customers and daily operations in a high-volume environment, maintaining accuracy, organization, and service quality under changing priorities.

EDUCATION

Software Development Bootcamp — UNLV Continuing Education — 2024
Certificate of Completion • 370 hours
